

The graph plots Görece Hata (m) on the y-axis (0 to 0.5) against Zaman (s) on the x-axis (0 to 25). Three data series are shown: Proposed (red dashed line), Reference (black solid line), and Comparison (cyan solid line). The Proposed method shows a peak error of approximately 0.5 m at 7 seconds and a minimum error of approximately 0.1 m at 11 seconds. The Reference and Comparison methods show similar trends but with slightly higher peak errors and lower minimum errors compared to the Proposed method.
